## SHIFT MAINTENANCE ENGINEER

An opportunity has now arisen on site for a qualified and experienced multi skilled Engineer to join the Maintenance team. The role itself will run on a four on four off twelve hour shift rota; offering support to a twenty four hour seven days a week production department in regard to the service and repair of the plant and equipment.

### Key tasks for the role include:

- The upkeep and service of rubber and plastic injection moulding machinery.
- Up keeping the remainder of the plant and equipment.
- Installation of Electrical and mechanical services.
- Involvement in continuous improvement projects.

### Essential Skills:

- The ideal candidate will be able to fault find on Electrical, Hydraulic and pneumatic circuitry.
- Have a minimum of 2 years working experience in a manufacturing environment
- Knowledge of PLC's is advantageous however no programming skills are required.
- The candidate must be able to work as a valued member of a small team and contribute to the growth of that team but must have autonomy as at times there will be only one engineer on shift.

### The ideal candidate will also have:

- A recognised apprenticeship scheme with relevant trade qualifications.
- Electrical regulations course certification.
- Experience of working in a busy, demanding manufacturing environment
- Strong organisational and time management skills.
- Excellent communication skills.
- Excellent time keeping and attendance.

In return, the role offers a competitive salary (dependant on experience and qualifications) plus shift allowance.

The closing date for applications is **Friday 24th August 2018.**

Please apply in writing, enclosing your C.V. to;
